

2009 International Workshop on Open-source Software for Scientific Computation CALL FOR PAPERS

Sep18-20, 2009 Guiyang, P.R.China

Over the past decade, Open-source Software for Scientific Computation (OSSC) has entered a fast growing stage for both industrial and educational purposes. In apart from a variety of the general-purpose platforms on scientific computing software, more and more open-source toolboxes or toolkits are available on the web for the specific scientific computations.

2009 International Workshop on Open-source Software for Scientific Computation will be held in September 18-20, 2009, in Guiyang, Guizhou Province, China.

The aim of OSSC 09 is to provide an international forum of exchanging the knowledge of using open-source software for scientific computation within the communities from education, academics, to industries. We expect contribution papers focusing on the development and applications of open-source software for scientific computation.

Authors are invited to submit papers on a variety of OSSC topics, including but not limited to:

- Architectures and implementation for OSSC development
- Open-source toolbox/toolkit for research or education purpose
- Mathematical modeling and numerical simulation in OSSC
- Computational science and engineering in OSSC
- Techniques and processes of OSSC projects
- OSSC education and training
- Innovation and issues in OSSC

Please note that all the papers must describe tools that are publicly available under a free software or open source license because the workshop theme is OSSC.

Honorable Chairs

Songde Ma CASIA, China
Michel Cosnard INRIA, France

General Chairs

Baogang Hu LIAMA, China
Christian Saguez ECP, France

Program Committee Chairs

Xiaoyao Xie Guizhou Normal University, China
Claude Gomez Scilab Consortium, France

Organization Chair

Shi Li LIAMA, China

Publication Chair

Mengqi Zhou IEEE Beijing Section, China

Organizers

LIAMA, Institute of Automation, CAS, Beijing, China
Guizhou Normal University, China

Co-Sponsors

IEEE Beijing Section, China
INRIA, France
Scilab Consortium, France

Important Deadlines:

Long Abstract (1-2pages) submission(Extended): Jul. 7, 2009
Acceptance notification: Aug. 1, 2009
Full paper submission: Oct. 20, 2009
Final notification of acceptance: Nov. 20, 2009
Camera ready: Dec. 10, 2009

The Important Venue

The workshop will be held at Guizhou Normal University, in Guiyang, the capital of Guizhou province, located amid the inland southeastern area, China Excellent City of Tourism.
